

Mgene Biosciences

Quality Products and Services at Affordable Price

Custom Peptides Synthesis

Mgene Biosciences provides a wide spectrum of customized assays and services to our partners in the biopharmaceutical and research communities including custom peptide. We have a strong commitment to high-quality custom peptide services. Our development team provides many years of experience in the design, synthesis and production of peptides using cutting edge chemistries with state-of-the-art instrumentation to provide the highest quality products to our customers. Our custom peptide synthesis stands out among our competitors by offering services and features such as:

Best Value in the Industry and Competitive prices

Personalized Consultation for our Customers Before and After the Sale

Specialized Mass Spec analysis

Detailed Quality Control Documentation

Fast Turn Around Time, 1-2 Weeks

Phosphorylated/Sulfated/Lipo peptides

Scale: from 1 mg to >100 mgs

Rhodamine/Fluorescein/Biotin Labeled Peptides

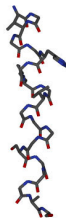

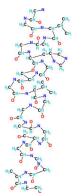

Purity Levels from Desalted to up to 99%

Extensive lists of modifications

Customized HPLC methodology

Mgene Biosciences can Offer:

Expertise that comes with our experience developing a wide spectrum of assays.

Quality that results from our commitment to achieving the highest standards, which include performing many QC steps between sample receipt and data delivery.

Flexibility that rises from our ability to offer a variety of other technologies with a special emphasis on your individual needs.
